#### JURISDICTIONAL DETERMINATION

U.S. Army Corps of Engineers

DISTRICT OFFICE:

NEW YORK DISTRICT (CENAN)

FILE NUMBER:

NAN-2006-445

PROJECT LC	CATION	INFORM	ATTON:
------------	--------	--------	--------

State:

New Jersey

County:

Monmouth

Center coordinates of site (latitude/longitude): lat:40-23-47.0040 lon:73-58-50.0160

Approximate size of area (parcel) reviewed, including uplands: 2.0 acres.

Name of nearest waterway: Shrewsbury River Name of watershed: Shrewsbury River

### JURISDICTIONAL DETERMINATION

Date(s):

### Jurisdictional Determination (JD):

- [X ] Preliminary JD Based on available information, [x] there appear to be (or) [] there appear to be no "waters of the United States" and/or "navigable waters of the United States" on the project site. A preliminary JD is not appealable (Reference 33 CFR part 331).
- [] Approved JD An approved JD is an appealable action (Reference 33 CFR part 331). Check all that apply:
  - [X] There are "navigable waters of the United States" (as defined by 33 CFR part 329 and associated guidance) within the reviewed area. Approximate size of jurisdictional area: 0.5 acres.

[]

- [X ] There are "waters of the United States" (as defined by 33 CFR part 328 and associated guidance) within the reviewed area. Approximate size of jurisdictional area:
- [] There are "isolated, non-navigable, intra-state waters or wetlands" within the reviewed area.
- [ ] Decision supported by SWANCC/Migratory Bird Rule Information Sheet for Determination of No Jurisdiction.

# BASIS OF JURISDICTIONAL DETERMINATION:

- A. Waters defined under 33 CFR part 329 as "navigable waters of the United States":
- [X] The presence of waters that are subject to the ebb and flow of the tide and/or are presently used, or have been used in the past, or may be susceptible for use to transport interstate or foreign commerce.

# B. Waters defined under 33 CFR part 328.3(a) as "waters of the United States":

- [](1) The presence of waters, which are currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide.
- [] (2) The presence of interstate waters including interstate wetlands<sup>1</sup>.
- [] (3) The presence of other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, the use, degradation or destruction of which could affect interstate commerce including any such waters (check all that apply):
- [] (i) which are or could be used by interstate or foreign travelers for recreational or other purposes.
- [] (ii) from which fish or shellfish are or could be taken and sold in interstate or foreign commerce.
- [] (iii) which are or could be used for industrial purposes by industries in interstate commerce.
- [] (4) Impoundments of waters otherwise defined as waters of the US.
- [] (5) The presence of a tributary to a water identified in (1) (4) above.
- [] (6) The presence of territorial seas.
- [X] (7) The presence of wetlands adjacent to other waters of the US, except for those wetlands adjacent to other wetlands.

Rationale for the Basis of Jurisdictional Determination (applies to any boxes checked above). If the jurisdictional water or wetland is not itself a navigable water of the United States, describe connection(s) to the downstream navigable waters. If B(1) or B(3) is used as the Basis of Jurisdiction, document navigability and/or interstate commerce connection (i.e., discuss site conditions, including why the waterbody is navigable and/or how the destruction of the waterbody could affect interstate or foreign commerce). If B(2, 4, 5 or 6) is used as the Basis of Jurisdiction, document the rationale used to make the determination. If B(7) is used as the Basis of Jurisdiction, document

the rationale used to make adjacency determination:

The proposed project may temporary and permanently disturb intertidal and subtidal shallows of Shrewsbury River, a navigable waterbody.

Lateral Extent of Jurisdiction: (Reference: 33 CFR part  [] Ordinary High Water Mark indicated by:  [] clear, natural line impressed on the bank  [] the presence of litter and debris  [] changes in the character of soil  [] destruction of terrestrial vegetation  [] shelving  [] other:	ts 328 and 329)  [x ] High Tide Line indicated by:  [] oil or scum line along shore objects  [] fine shell or debris deposits (foreshore)  [x ] physical markings/characteristics  [] tidal gages  [] other:
[x] Mean High Water Mark indicated by: [] survey to available datum; [] physical markings; [] v	vegetation lines/changes in vegetation types.
[] Wetland boundaries, as shown on the attached wetland d	
Basis For Not Asserting Jurisdiction:  [] The reviewed area consists entirely of uplands.  [] Unable to confirm the presence of waters in 33 CFR part [] Headquarters declined to approve jurisdiction on the bas [] The Corps has made a case-specific determination that the United States:  [] Waste treatment systems, including treatment ponds of [] Artificially irrigated areas, which would revert to uplar [] Artificial lakes and ponds created by excavating and/or retain water and which are used exclusively for such purice growing.  [] Artificial reflecting or swimming pools or other small of by excavating and/or diking dry land to retain water for [] Water-filled depressions created in dry land incidental the purpose of obtaining fill, sand, or gravel unless and abandoned and the resulting body of water meets the decays.  [] Isolated, intrastate wetland with no nexus to interstate of [] Prior converted cropland, as determined by the Natural [] Non-tidal drainage or irrigation ditches excavated on decay and the converted croplain):	is of 33 CFR part 328.3(a)(3). The following waters present on the site are not Waters of the relagoons, pursuant to 33 CFR part 328.3. The first irrigation ceased. The diking dry land to collect and the arroses as stock watering, irrigation, settling basins, or commental bodies of water created to primarily aesthetic reasons. To construction activity and pits excavated in dry land for until the construction or excavation operation is refinition of waters of the United States found at 33 CFR commerce.  I Resources Conservation Service. Explain rationale:

[] Applicable/supporting case law:
[] Other information (please specify):

<sup>&</sup>lt;sup>1</sup>Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology).

<sup>&</sup>lt;sup>2</sup>The term "adjacent" means bordering, contiguous, or neighboring. Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river berms, beach dunes, and the like are also adjacent.
